

# GANESH HILALPURE

Bengaluru, India | 9108410034 | [ganesh.hilalpure04@gmail.com](mailto:ganesh.hilalpure04@gmail.com) | <https://www.linkedin.com/in/ganeshhilalpure>

## PROFESSIONAL SUMMARY

Aspiring AI&ML Engineer with hands-on experience in building end-to-end machine learning solutions across telecom, healthcare, and finance domains. Skilled in Python, SQL, EDA, feature engineering, and model deployment. Proven ability to translate data insights into actionable business strategies, improving customer retention, risk prediction, and operational efficiency. Passionate about leveraging AI to drive data-informed decisions.

## TECHNICAL SKILLS

**Languages & Databases:** Python, SQL (MySQL, PostgreSQL), C++.

**Libraries:** Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn, PyTorch.

**Machine Learning:** Classification, Regression, Clustering, Hyperparameter Tuning.

**Techniques:** Exploratory Data Analysis, Feature Engineering, Handling Imbalanced Data (SMOTE), Model Evaluation (ROC-AUC, Recall, RMSE).

**Generative AI & LLMs:** RAG, LLM Fine-Tuning, LangChain, Hugging Face, Vector Databases (FAISS/ChromaDB)

**Tools:** Jupyter Notebook, Git, Google Colab, Excel, Power BI, Cursor, Claude Code.

## EDUCATION

### B.E in Artificial Intelligence & Machine Learning

Poojya Doddappa Appa College of Engineering, Kalaburagi | Nov 2021 – Jul 2025

CGPA: 7.4/10

## PROFESSIONAL EXPERIENCE

### AI Engineer Trainee – Datamites (July 2025 – Mar 2026)

- Performed **data preprocessing, data cleaning, exploratory data analysis (EDA), and feature engineering** on real-world datasets to prepare data for machine learning applications.
- Built and deployed **Machine Learning, Generative AI, and Agentic AI solutions** using Python, SQL, and modern AI frameworks.
- Developed **AI agents and LLM-powered workflows** for automation, data analysis, and intelligent decision-making.
- Applied **predictive analytics, model optimization, training, and evaluation techniques** to improve model performance and solve business problems.

### Data Analyst Intern – Unified Mentor Pvt Ltd (Oct 2024 – Feb 2025)

- Created interactive Power BI dashboards and KPI reports to support business decision-making.
- Wrote optimized SQL queries for data extraction, transformation, and analysis from large datasets.
- Performed data cleaning, validation, and exploratory data analysis using Python and Excel.
- Generated actionable insights by identifying trends, patterns, and key business metrics

## PROJECTS

### 1. GenAI Agentic HR Assistant

- The GenAI Agentic HR Assistant is an AI-powered application designed to streamline HR management tasks.
- Developed an AI-powered HR assistant using **LangChain, Groq-Mistral, MongoDB, and Streamlit** for intelligent HR automation.
- Built **RAG-based agentic workflows** to retrieve employee information, manage records, and support team formation through natural language interactions.
- Integrated LLM-powered query resolution and decision support, enabling efficient and context-aware HR management.

### 2. Telecom Customer Churn Prediction

- Extracted and preprocessed customer data from SQL database, performing EDA to identify key churn drivers such as usage patterns, tenure, and service complaints.
- Engineered features and applied SMOTE to address class imbalance, improving recall for churners by 18% compared to baseline.
- Built and compared Logistic Regression and Random Forest models, achieving 86% ROC-AUC and enabling early identification of high-risk customers.
- Generated a CHURN\_FLAG and delivered actionable insights to marketing team, supporting targeted retention campaigns and reducing churn rate by an estimated 12%.

### 3. Heart Disease Prediction

- Analyzed clinical dataset with 13 features (blood pressure, cholesterol, ECG results) through EDA and correlation analysis to uncover risk factors.
- Engineered interaction features and applied scaling; trained Logistic Regression, Random Forest, and XGBoost with cross-validation, achieving 89% recall for disease detection.
- Addressed class imbalance using SMOTE and optimized decision threshold to balance sensitivity and specificity.
- Provided hospital with feature importance analysis and recommendations for integrating model into preventive care workflows, potentially enabling early intervention for high-risk patients.

## CERTIFICATIONS

- **AI Engineer** - Datamites, Bengaluru
- **IABAC** - Artificial Intelligence Expert, Data Science Foundation
- **NASSCOM** – Artificial Intelligence Engineer
- **DATA SCIENCE** - Rubixe
- **Data Analyst** –Unified Mentors Pvt Ltd
